Grapevine Propagation Specialists

Home of the HI-STEM®

## PRIORITY SERVICE FOR REPEAT CUSTOMERS

As a Repeat Customer, you will receive a phone call after harvest in autumn confirming your annual order for replacements. You may choose to proceed, modify or cancel the order. Either way, you are allowing us to remind you to plan ahead.

There is no obligation to buy, there is no minimum commitment. There is nothing to lose except future disappointment.

## CUSTOMISED PLANS FOR REPLANTING

- Free initial consultation with an experienced viticulturist
- Multiple Year Vine Supply Agreements
- Attractive forward ordering rates
- Offering a range of product options to get you back into production as soon as possible

## ORDERING

Plants are grafted each spring for delivery the following winter/spring. In order to ensure that you get the exact grafted combination you require, we recommend that you order your plants well in advance.

To check out plants in stock for the current year, please visit our website [www.ormondnurseries.co.nz](http://www.ormondnurseries.co.nz) and click on 'Plants Available'.

As a lead supplier of certified, grafted grapevines, we offer a range of dormant bare root and potted vines specifically designed to add value to vineyard projects.

# With over 40 years of experience, Ormond Nurseries Ltd is the oldest family-run grapevine propagation company in New Zealand.

## LOCAL

- Locally owned family business based in Marlborough
- Specialising in propagating top-quality, grafted grape plants for the New Zealand wine grower market

## EDUCATION AND COMMUNITY

- Supporting and contributing to education nationwide
- Supporting sports teams nationwide
- National sponsor of the Young Viticulturist of the Year competition since 2006
- Proud supporter of Life Flight Trust

## INNOVATIVE, PRICE COMPETITIVE AND PRO-ACTIVE

- Operating our own (award winning) vineyards to help us empathise and understand grower issues
- On-going innovation of grafted grapevine product types to help with everything from green field development to individual replacements
- Assistance with immediate and long-term vine replanting plans
- Collaboration and learning through our own on-site vineyard replant projects
- Annual repeat order system with no minimum purchase requirement
- We Elisa test all scion mother vines for GLRaV-3

## Ormond Nurseries Ltd offers a range of product types to help customers with development, replanting and replacing.

### VINEYARD GREEN FIELD DEVELOPMENT AND REPLANTING

#### Standard Bare Root Vine HI-STEM® Bare Root Vine

With the benefit of twice the length of machine disbudded rootstock, HI-STEM® bare root vines offer the advantages of:

- Minimal vine training
- No bud rubbing.... ever!
- No spot spraying
- No vine guard
- Ideal for sites prone to frost and pests (rabbits)
- Less time for a replanted vineyard to be out of production
- Ideal for organic vineyards
- Ideal for terraced vineyards
- Ideal for any site that requires immediate 'street side appeal'

Visit [www.ormondnurseries.co.nz](http://www.ormondnurseries.co.nz) for further information on all of our products as well as the varieties, clones and rootstocks we are able to supply.

### REPLACING INDIVIDUAL VINES IN A MATURE VINEYARD

#### Ultra Vines

Advantages include:

- Faster production
- Ease of a dormant, potted vine
- Less likely to J-Root
- Ultra vigorous from day one to help you get back into full production as soon as possible

Our Ultra vines are potted, dormant grape plants that have been grown-on for a year in a pot before being two-budded in winter. With an uncompromised root system, our Ultra vines are ideal for replacements in and amongst a mature vineyard where new vines need to establish while also competing underground.

We have Ultra vines available as either Standard Ultra vines or HI-STEM® Ultra vines.
