

As a lead supplier of certified, grafted grapevines, we offer a range of dormant bare root vines specifically designed to add value to vineyard projects.

With over 40 years of experience, Ormond Nurseries Ltd is the oldest family-run grapevine propagation company in New Zealand.

LOCAL

- Locally owned family business based in Marlborough
- Specialising in propagating top-quality, grafted grape plants for the New Zealand wine grower market

EDUCATION AND COMMUNITY

- Supporting and contributing to education nationwide
- Supporting sports teams nationwide
- National sponsor of the Young Viticulturist of the Year competition since 2006
- Proud supporter of Life Flight Trust

INNOVATIVE, PRICE COMPETITIVE AND PRO-ACTIVE

- Operating our own (award winning) vineyards to help us empathise and understand grower issues
- On-going innovation of grafted grapevine product types to help with everything from green field development to individual replacements
- Assistance with immediate and long-term vine replanting plans
- Collaboration and learning through our own on-site vineyard replant projects
- Annual repeat order system with no minimum purchase requirement
- We Elisa test all scion mother vines for GLRaV-3

Ormond Nurseries Ltd offers a range of product types to help customers with development, replanting and replacing.

PRIORITY SERVICE FOR REPEAT CUSTOMERS

As a Repeat Customer, you will receive a phone call after harvest in autumn confirming your annual order for replacements. You may choose to proceed, modify or cancel the order. Either way, you are allowing us to remind you to plan ahead.

There is no obligation to buy, there is no minimum commitment. There is nothing to lose except future disappointment.

CUSTOMISED PLANS FOR REPLANTING

- Free initial consultation with an experienced viticulturist
- Offering a range of product options to get you back into production as soon as possible

ORDERING

Plants are grafted each spring for delivery the following winter/spring. In order to ensure that you get the exact grafted combination you require, we recommend that you order your plants well in advance.

VINEYARD GREEN FIELD DEVELOPMENT AND REPLANTING

Standard Bare Root Vine HI-STEM® Bare Root Vine

With the benefit of twice the length of disbudded rootstock, HI-STEM® bare root vines offer the advantages of:

- Minimal vine training
- No bud rubbing.... ever!
- No spot spraying
- No vine guard
- Ideal for sites prone to frost and pests (rabbits)
- Less time for a replanted vineyard to be out of production
- Ideal for organic vineyards
- Ideal for terraced vineyards
- Ideal for any site that requires immediate 'street side appeal'
